

# Double-Quick

*"One of the best machines I have come across! The slitter, rear roller and brush can do the job of three machines in one pass."*

## Aerate, Roll, Rake and Brush... all in one pass

Aeration is proven to restore the health of compacted sports turf. Light rolling is necessary to keep the surface smooth. Raking lifts out thatch and stands the grass up allowing better air circulation which helps to reduce the risk of fungal disease, and brushing disperses dew and leaves a smart striped finish.

If you've never had time to do all these vital treatments as often as you should, now's your chance to do them all in one go. Every time you aerate you can do all four operations with no extra manpower or time taken, thanks to the Double-Quick's all-in-one Rear Roller, Rake and Brush attachment.

## Quick attachment changeover - *No tools needed!*

The heart of the system is the unique Main Frame, which can carry two attachments of your choice, mounted one above the other. So you can change from Deep Slitter to Ballast Roller etc by just turning the Main Frame over.

**1** Remove pins holding top guard and rear attachment.

**2** Attach tow cable to tractor and Double-Quick.

**3** Drive tractor forward to roll Double-Quick over.

**4** Re-attach to tractor and replace top guard.

### Mix And Match Your Attachments To Suit Your Needs...

**DEEP SLITTER** – With closely spaced 8 1/2" tines, this gives a dense pattern of aeration for heavily used winter games pitches and fairways.

**FINE SLITTER** – Even closer spaced 5" tines – to prevent surface sealing and increase the absorption of air, water and fertiliser.

**HOLLOW CORER** – The hollow corer removes plugs of soil, letting the ground expand and decompact.

**SOLID TINER** – The 4" round tines spike neat holes which help prevent clay soils cracking in dry weather.

**DISC SLITTER** – The continuous slits give maximum air and water absorption, plus they prune the grass roots to stimulate vigorous new growth.

**BALLAST ROLLER** – Fill it with water for maximum effectiveness; use it part full or empty for a light rolling.

**REAR ROLLER** – Great for firming back divots after slitting.

**SCARIFYING RAKE** – Fast effective thatch control, as you go. Attaches to the rear roller above.

**REAR BRUSH** – Can also be attached to the Rear Roller, to leave a well groomed appearance

DOUBLE QUICK (PATENTED)	WEIGHT (KG)	
	6FT	8FT
Main Frame	200	290
Deep Slitter	122	160
Fine Slitter	129	170
Disc Slitter	38	50
Hollow Corer	120	170
Solid Tiner	200	-
Ballast Roller	180	200
(Weight of water ballast)	220	290
Rear Roller and Carrier	91	115
Rear Rake	17	20
Rear Brush	8	10

6' for 35hp + tractors; 8' for 50hp + tractors

### THE SOLUTION...

- ✓ Relieves compaction, allowing turf to breathe – and grow!
- ✓ Opens up the soil structure and improves drainage
- ✓ Stimulates deeper roots which resist drought in summer
- ✓ Encourages stronger turf that is less likely to scuff off in winter
