

*professional tractor powered mowing equipment*

# Ezeemow<sup>S2</sup><sup>TM</sup>

*For a mower that 'does the job' in virtually any mowing conditions the Ezeemow is the ideal partner for your compact tractor. No other mower stands up to the rigors of day to day operations in such a variety of applications like the Ezeemow. From grooming parks to shredding small prunings the Ezeemow is the mower for the job.*

*compact versatility*

*...just add tractor!*

The Ezeemow is compatible with tractors from 14 to 45hp and its compact dimensions allow manoeuvrability in tight corners. It can handle fine turf, small prunings and one meter high grass with minimal maintenance and maximum reliability. This versatility makes the Ezeemow ideal for contractors, councils, roadsides, lifestyle blocks, estates and orchards.

*Rollers allow the mower to be safely run along kerbs .*

*Your ideal roadside mowing partner.*

### Rugged construction

Well thought out design, high strength materials and robust monocoque construction, ensure the Ezeemow can withstand the harshest conditions and most demanding operators.

*Perfect for orchard and lifestyle block mowing.*

*Stripes fine turf with ease.*

### Safety first

Safety is of paramount importance when mowing in public areas such as parks, schools and roadsides. This is why Trimax has designed the Ezeemow to expel debris in a downward direction behind the mower.

### Power saving blades

The aerodynamic shape of Trimax's unique Gamma™ flails means the tractor's power is used for cutting grass or shredding vegetation, not for pumping air. This equates to lower horsepower requirements, allowing this mower to operate in difficult conditions when powered by a compact tractor. The carefully engineered airflow means all clippings are expelled evenly behind the mower without clumping.

### Offset model

Offset versions provide maximum safety whilst mowing along roadside kerbs and drains, and the low profile body enables easy mowing under low hanging vines and trees.

*Conveniently fits between horticulture rows.*

# Specifications

The manufacturer has a policy of continuous improvement, therefore specifications may change without notice.

DESIGNED & MANUFACTURED IN  
**NEW ZEALAND**

**(A) Three point linkage mounting**

Dual category linkage pins.  
Centre mount option also available (excludes E2 135 model).

**(B) Integral gearbox**

Eliminates drive belt idler pulleys.

**(C) Drive belt guard**

Strong, compact and ventilated.

**(D) Roller bearing protection package**

Increases bearing life.

**(E) Adjustable rear roller**

Full width.  
Domed ends reduce scuffing on turns.

**(F) Blades**

Trimax exclusive Gamma™ flails.  
High mass.  
Aerodynamic power-saving design.  
Long life.

	<b>E2 135</b>	<b>E2 155</b>	<b>E2 185</b>
Cutting Width	1.34m (53")	1.50m (59")	1.83m (72")
Overall Width	1.56m (61")	1.72m (68")	2.05m (81")
Approx. Weight	180kg (400lb)	200kg (440lb)	225kg (497lb)
Min Power	12kW (15hp)	13kW (17hp)	15kW (20hp)

**(G) Body**

Monocoque construction.  
High tensile steels.  
Low weight.

**(H) Rotor (underneath)**

Dynamically balanced for smooth running.

**(I) Compact design**

Low profile.  
Mounts close to tractor.

**WARNING:** Machinery shown in this publication may have protective guards removed for demonstration purposes. Trimax strongly recommends the use of safety guards and shields during normal operation to reduce the risk of property damage, serious bodily injury or even death from objects thrown out by, or from contact with the cutting blades.
