

Shelton SUPERTRENCHER 450

Designed for installing pipes and secondary drainage on sportsturf.
The trencher's digging wheel is pto driven and fits onto the tractors 3-point linkage.
Trench width is adjustable from 25mm(1") to 97mm(4").
Trench depth is hydraulically adjustable from 200mm(8") to 450mm(18")
with laser grading capability.
The conveyor is 2.6 metres long and is hydraulically driven.
Constructed mainly in stainless steel, the trencher is designed to operate on tractors
with a hydrostatic drive or creep gearbox, from 45hp upwards.
