

ARTIFICIAL TURF

VERTI-COMB

A common misconception is that synthetic turf requires little maintenance, but regular attention is vital to ensure optimum playing performance and durability. This can be achieved with the Verti-Art range of synthetic turf care equipment, manufactured by Redexim North America.

The Verti-Comb is designed for brushing and decompacting large areas of turf fast and efficiently.

VERTI-COMB

Foldable side wings can be added to the standard Verti-Comb 1800 model (72" (1.8m) working width) converting it into the model 4000 (158" (4.0m) working width). Several options can be added, like steel front or rear rakes for decompaction, a magnet strip for picking up steel debris, and a transport wheel kit with drawbar makes it possible to pull the Verti-Comb with any vehicle.

WORKING SPECIFICATIONS

Models:	1800	4000
Working width:	72" (1.8m)	158" (4.0m)
Weight:	229lbs (104kg)	485lbs (220kg)
Tractor required*: With lift cap of:	18HP 440lbs (200kg)	25HP 990lbs (450kg)
Total width when folded:	-	4.0ft (1.22m)
