MAINTENANCE

VERTI-RAKE

The Verti-Rake decompacts turf surfaces using thin spring-loaded flexible tines. The tines are integrated in a special protection device that will prevent the loss of tines during operation.

These tines scratch between turfblades and loosen up thatch. Removing loose material can reduce thatch layer. Oxygen and nutrients can be more easily introduced into the surface area resulting in a healthier playing field.

VERTI - RAKE

- The flexible tines can be replaced with optional brushes in the same working width.
- The Verti-Rake range consists of various models; with working widths ranging from 60" to 236" (1.5m to 6m)
- The wider models are for use in larger turf areas and are foldable either mechanically or hydraulically.

WORKING SPECIFICATIONS

	Number of rakes	Foldable
Standard 210	84	no
Standard 300	120	no
Standard 240 H	240	hydraulically
Pro 150	114	no
Pro 200	162	no
Pro 300	228	no
Pro 450 M	342	mechanically
Pro 450 H	342	hydraulically
Pro 500 M	390	mechanically
Pro 500 H	390	hydraulically
Pro 600 H	456	hydraulically

FEATURES / BENEFITS

FEATURE	BENEFIT
flexible tines	loosen soil and removes thatch
Optional brush	versatile piece
Light weight	can be used with most compact tractors
