

Multi-Roller

THE SOLUTION...

- ✓ Three separate rollers follow undulations
- ✓ Hydraulic folding for quick and easy operation
- ✓ Fits to mid size compact tractors
- ✓ Quickly restores the surface of your pitches

MULTI-ROLLER

Working width	5.4m (18') or 1.8m (6')
Transport width	2.5m (8'2")
Weight	650kg

The fast and easy way to restore your pitch

If you have a large area of turf that needs a regular light rolling, the Multi-Roller has been designed for just that! It has been specially developed to meet the needs of Football Academies and Sports Complexes with several pitches that require a regular light rolling to restore the surface between games.

Covering a massive 18' (5.4m) working width, and yet weighing only 650kg, the secret of its effectiveness is its small diameter rollers which give a greater rolling pressure for their weight than large diameter rollers would do.

Used in conjunction with just a mid range compact tractor, it is now possible to roll a full pitch in approximately 20 minutes!

Hydraulic folding.
