

# VERTI-DRAIN

# 7626

The 7626 is the heaviest and toughest Verti-Drain on the market. It is the ideal machine for the toughest of soil conditions, where a high productivity is needed. It weighs considerably more than the 75-series, and it has a heavier gearbox, PTO and rear roller support. Its adjustments have been made simpler. The tine-depth adjustments are made comfortably from the tractor seat via the hydraulic controls, while the original amount of 'heave' on the tine is left intact.

# VERTI-DRAIN 7626

The optional wheel support is constructed extra robustly, while it falls within the 104" (2.6 m) working width of the Verti-Drain. The forward speed is faster than that of the 75-series.

Verti-Drains adjustable parallelogram design shatters the soil, and also allows for clean Coring, on all models.
