1300/1600

The new hydraulic powered Easy Spread provides all the benefits of its predecessor like the unique Easy Spread one-man operation. This machine can load itself and can spread up to 80 tons a day without the operator leaving the cab.

Without a doubt, the Easy Spread is the perfect, low cost solution to what was a most back-breaking task, making it an ideal machine for all sportsgrounds.

# EASYSREAD 1300/1600

The Easy Spread can also be used for spreading salt on pathways in the winter. The hydraulically driven feed drum gives the operator greater control.

The Easy Spread can be adjusted from thick top dressing to light without leaving the tractor seat.

Loading is made easy with Easy Spread's hydraulically operated tilt
